

Dear Future Second Grader and Family,

Welcome to second grade! I can't wait to get to know you and your (almost) second grader. Our year will be filled with fun opportunities for growth and learning.

Your child's first assignment as an incoming second grader is to exercise their brains in math and reading over the summer. Attached to this letter you will find a 5-A-Day Math Summer Review packet. Use the gameboard to track your child's progress. Each week contains 5 days of math problems.

I have also attached a Summer Reading Log along with a summer reading challenge to encourage your child to have fun while learning this summer. Please have your child read paper books as often as possible rather than books online.

The reading log and math packet will be collected on the first day of school. They will be counted as a first trimester grade. Thank you for your cooperation! Have a great summer and I will see you this September

Sincerely,
Ms. Spence
